

NETFLIX IS THE BEST TV APP

Did you know that Netflix has over 137 million users?

H

1 Streaming services are very popular for watching movies. Netflix started as a subscription company that rented DVDs to its clients. It allowed people to watch movies when they wanted for a low price. Watching movies and TV shows is very popular around the world, but using DVDs is not as popular and convenient anymore. Netflix is the best way to watch programs because it is available over all platforms, the account is personalized and it is very user friendly.

(2) To start, Netflix is the best because you are able to watch on any device. First, you can watch on your TV in your living room. This is great because the screen is big, the sound is rich and you can be comfortable on the sofa. Second, you can watch on your phone/tablet. This is useful for travelling and convenience. Some people actually watch on the bus or even in the bathroom. Finally, Netflix can be viewed on your computer. If you are at work, you can watch a movie at lunch or to kill time. This is one reason why Netflix is fantastic.

(3) Not only can you watch across platforms, Netflix accounts are tailored to you personally. Your account keeps track of what you watch and then recommends other shows you might like. No more thinking about what might be good; Netflix learns about you and picks for you. You can also have five personalized accounts on one subscription. The whole family can keep track of their own favourites.

(4)

Along with multiple devices and personalized accounts, Netflix is so user friendly. The sign-up process is easy; you need an email and credit card. Also, picking movies or shows is done by one or two clicks. And finally, if you want to quit, you can cancel your membership with an email. Netflix is so convenient.

(5)

As it has been demonstrated, Netflix is a great way to view shows and movies because you can watch on any device, your account is tailored to you and finally, it is so easy to use. Watching movies is a great way to relax and Netflix makes it so much fun. DVDs and Blu-ray discs are still popular, but streaming has become the way of the future. I wonder what will be after Netflix?
